

25X1A9A

(Minutes of OCh/G Staff Meeting 29 March 1954)

25X1A9A PRESENT:

[REDACTED]

25X1A9A 1. [REDACTED] reported that there is some question concerning the plans for changing the title of the Map Intelligence Review to Geographic Intelligence Review at this time. This matter was discussed with [REDACTED] on 26 March, and there will be further discussions between [REDACTED] before a definite decision is reached.

25X1A9A

25X1A9A 2. There was some discussion concerning plans of individuals within the Geographic Area to attend the Philadelphia meetings of the AAG. It was decided that official leave for attendance at the meetings would be valid for 12, 13, and 14 April only. This means that any personnel desiring to participate in the field trip scheduled for 15 April will have to do so on annual leave. All divisions were directed to submit to [REDACTED] the names of persons planning to attend the meetings, and a consolidated memorandum requesting security clearance will be prepared in OCh/G.

25X1A9A

3. The review of training requirements for fiscal year 1955 and the statement of anticipated training requirements for fiscal year 1956 was begun. [REDACTED] presented and discussed the requirements of D/GG, and it was agreed that all four Divisions will submit their statements of requirements to OCh/G not later than 5 April. The Divisions' requirements, together with those of OCh/G, will be consolidated and forwarded to the Training Liaison Officer not later than 10 April.

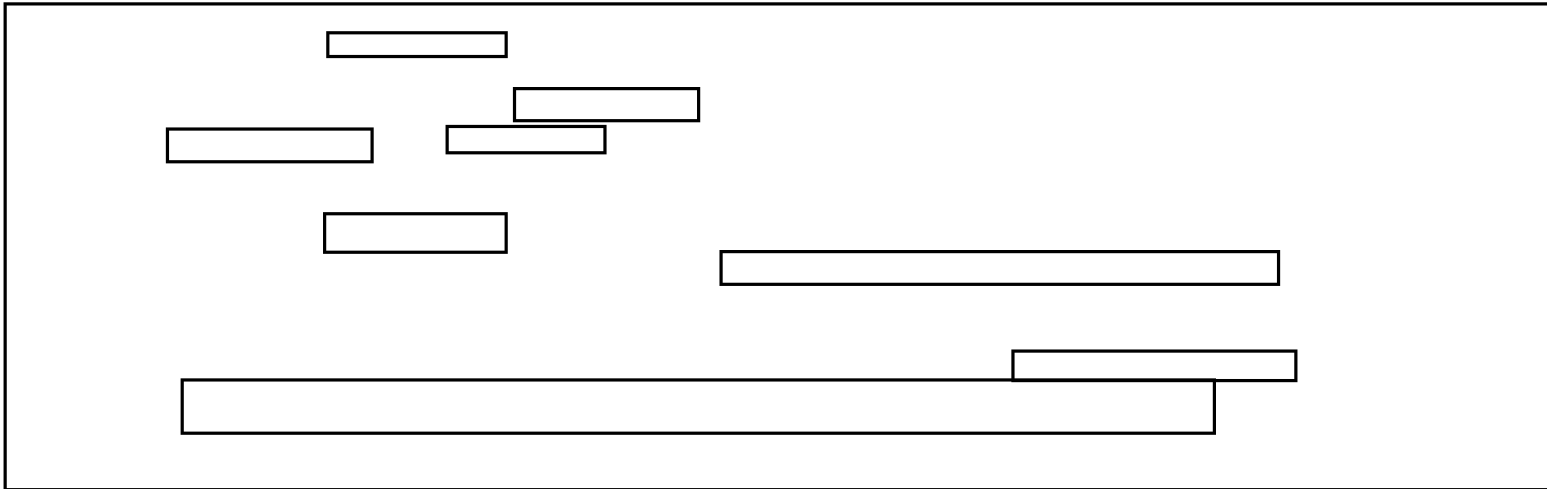

4. The scheduled discussion of selected reports produced by the Economic Area was postponed due to the fact that not all members of the group were prepared to discuss them at this meeting.

25X1A9A 5. [REDACTED] reported that there was some concern in D/GG over the long time required for intelligence documents to reach them. 25X1A9A [REDACTED] is to explore this problem with the Information Control Unit and determine what remedial measures can be taken there. It was pointed out that the problem of screening the large bulk of

25X1

intelligence documents entering the Information Control Unit, in order to determine which should receive priority treatment for dissemination to the Divisions, is a rather important stage in the processing and that the personnel performing this screening should be thoroughly familiar with the real needs of the Divisions.
